

DRY & DRAIN Absorptive Claddings.

DELTA®-DRY

Ventilated rainscreen for absorptive claddings.

- Lightweight, making it easy to cut and install.
- Critical drainage and drying for exterior walls.
- Controls moisture in wall assemblies.
- Dual sided drainage.
- Dramatically reduces the risk of wall rot and decay.
- Exceptional drying capability.
- Full capillary break.
- Stops solar-driven moisture.
- Extremely durable.
- Integrates easily with cladding.
- Simple detailing.
- ICC ESR-2987

Roll length: 50' (15.24 m), **Roll width:** 3' 3" (1.0 m)

DELTA®-DRY STUCCO & STONE

Ventilated rainscreen with pre-installed mortar screen for absorptive claddings.

All benefits of DELTA®-DRY plus:

- Factory installed mortar screen reduces scratch coat consumption.
- Factory installed mortar screen helps ensure drainage and ventilation.

Roll length: 46' (14 m), **Roll width:** 3' 3" (1.0 m)

DELTA®-DRY & LATH

Ventilated rainscreen with pre-installed glass lath for absorptive claddings.

All benefits of DELTA®-DRY plus:

- Fiberglass lath is safer to handle and install than metal lath.
- Uses fewer fasteners.
- Dramatically reduces installation time and costs.
- Fiberglass is resistant to chemicals and corrosion.
- Fiberglass lath complies with ICC-ES AC275 and AC356.
- IAMPO UES ER-323

Roll length: 46' (14 m), **Roll width:** 3' 3" (1.0 m)
